

Automate the Reports Scheduling.

Get visibility across all Reporting Requirements.

Within the same platform.

## DATA AUTHORITIES

### Optimize the Reports Scheduling processes with automation

As its core functionality, the ATOME Vortex solution gives Data Authorities the power to seamlessly generate and update multiple reporting schedules for the supervised reporting entities with a few button pushes.

When requirements or filling dates change, with ATOME Vortex Data Authorities can dynamically update the respective schedules to reflect the most current state for their subordinates.

## REPORTING ENTITIES

### Gain confidence with a Single Source of Truth for your reporting requirements

For Data Authorities' subordinates, Reporting Entities, ATOME Vortex serves as a single source of truth for Reporting Requirements, thus providing them with greater transparency and accuracy of reports.

Leveraging the capability to view the list of reports scheduled for them and keep track of all relevant reporting requirements – Reporting Entities may focus on preparing the compliant report on time, not chasing the regulatory requirements and related changes.
